TITLE : UPS SYSTEM

ABSTRACT : PROBLEM TO BE SOLVED: To perform proper maintenance inspection of a UPS by making a user recognize the maintenance inspection by securely and easily performing user registration of the UPS without following a conventional procedure of filling and sending a registration form.

SOLUTION: A UPS system comprises a computer which is connected to a network and the UPS (uninterruptive power supply) connected to the computer and the computer stores control software which controls the UPS; and the control software after obtaining characteristic information stored in the UPS actuates Internet browsing software stored in the computer and accesses a homepage for user registration of the UPS.
